## KIT BENDING PIPES PROBES

Comfortable and smooth at all phase

### Product informations

Bending probe kits, in plastic material and round profile, are characterized by a high flexibility and a remarkable consistency that allows the bending of the copper pipe without creating harmful narrowing; comfortable both during insertion/extraction from the pipe and when bending thanks to their smooth structure.

**You will obtain perfect bends even without removing the insulation and without the fear of crushing!**

### The kit includes

- 5 m probe for copper pipe Ø 1/4"
- 5 m probe for copper pipe Ø 3/8"
- 5 m probe for copper pipe Ø 1/2"
- 4 m probe for copper pipe Ø 5/8"
- comfortable ABS case
