# CHARGE VALVE

Complete of pins and cap

## Product informations

Charge valve complete of pins and cap.

## Recommended fitting conditions

To prevent damage to the mechanism, remove the same before brazing

## Pressure resistance

- **operating pressure** is the maximum pressure under which the core plunger can be operated without being deteriorated during the opening-closing movement
- **static pressure** is the maximum pressure under which the mechanism can safely still in the closed position during its life; it may be called also working pressure

## Refrigerants compatibility

Internal mechanisms are suitable for refrigerants *HCFC, HFC and R744*.

## Lubricants compatibility

Internal mechanisms are suitable for lubricants *PAG, POE and MO (mineral oil)*.

## Typical applications

- *Sku 11525*: highly recommended for all the most typical applications
- *Sku 11749*: has an internal spring, and consequently easier/stronger to handle
