

FLANGED COMPENSATOR JOINT

Anti-vibration, built in stainless steel material

Product informations

Flanged compensator joint consisting of a bellows with parallel waves in AISI 304 stainless steel, with an AISI 304 stainless steel conveyor inside and connected at the ends with a flange with UNI PN16 drilling; this product is ideal for absorbing axial expansion in heating systems.

Technical Features

MAX INLET PRESSURE	0,5 BAR
MAX WORKING TEMPERATURE	100°C
MATERIALS	BELLOWS AND CONNECTIONS: AISI 304 STEEL
