**Electrofusion Elbow 90° HDPE/Brass Male**

## ELECTROFUSION ELBOW 90° HDPE/BRASS MALE

For water and gas

### Product informations

Injection molded connection, equipped with a modular system with electrical resistance inside in the body of the fitting and smooth internal surface in the welding area in order to guarantee greater safety when inserting the fitting pipe, with better heat emission of the resistance.

***PE100 SDR11 - Maximum permissible operating pressure 16 bar (water).***
