

## MAGNETIC ANTI-LIMESCALE SYSTEM

Model TECNOCAL

### Product informations

Magnetic anti-limescale system in AISI 420 steel, designed to prevent the deposit of limescale in pipes and appliances, without resorting to the use of chemical products and additives.

### Product features

- constructed using a longitudinal magnetic field (in the direction of water flow)
- they are perfectly insulating and there is no contact between the magnets and the water
- no change in the organoleptic structure of the water
- it does not require electricity
- increase plant efficiency
- it needs no maintenance
- suitable for utilities such as washing machines, boilers and dishwashers
- for domestic use use "Maxi Tecnocal"

### Technical Features

- Available flow rate: 30 l/min - 56 l/min - 40 l/min - 55 l/min - 80 l/min - 184 l/min - 240 l/min - 280 l/min
- Available connections: 1/2" - 3/4" - 1" - 1" 1/4 - 1" 1/2 - 2" MF
