POLYVALENT WELDING MACHINES

Models TucaTuca Baby / TucaTuca Baby Evolution

Product informations

Polyvalent electrofusion welders with optical reading with manual emergency mode, they are the ideal solution for the installer involved in the construction of PE systems for pressurized water and gas; multipurpose products for total freedom in choosing the electrofusion fittings to use. Suitable for the use of fittings up to a maximum diameter of 315 mm and simple to use by manually setting the values with the time/voltage method, or by using an optical pen or scanner, available as an option in the Evolution version. They can also be used in the welding of some brands of PPR fittings, mainly used in thermo-sanitary plant engineering.

Complete with bag in synthetic material and equipped with serial port for printer/pc.

Available accessories

- Optical pen kit for evolution version
- Scanner kit for evolution version

Technical Features

Polyvalent Welding Machines

SKU 21607	
SINGLE-PHASE POWER SUPPLY	230 V 50-60 HZ
OUTPUT VOLTAGE	8 ÷ 48 V
MAX OUTPUT CURRENT	95 AMP
60% DUTY CYCLE OUTPUT	55 AMP
MAX INPUT POWER	3,8 KVA
WORKING RANGE	20 ÷ 315 MM
TEMPERATURE RANGE	- 10°C ± 45°C
OPERATING MODES	BARCODE - MANUAL
MANUAL SYSTEM	TIME / VOLTAGE
INTERNAL MEMORY	300 REPORTS
DEGREE OF PROTECTION	IP54 (PROTECTED AGAINST SPLASHES OF WATER FROM ANY DIRECTION AND PROTECTED AGAINST DUST SUCH AS NOT TO INTERFERE WITH THE OPERATION OF THE DEVICE)
DIMENSIONS	290 X 190 X 250 MM
WEIGHT	17 KG
EQUIPPED WITH OPTICAL READER SCANNER	

SKU 21611	
SINGLE-PHASE POWER SUPPLY	230 V 50-60 HZ
OUTPUT VOLTAGE	8 ÷ 48 V
