

OPTIONAL FILTERS

ISO COARSE models

Product informations

ISO COARSE filters allow more efficient filtration of particles with a diameter greater than 10 um (such as hair, pollen, sand, dust in general).

The filters are available only for the Ø 160 mm and with different degrees of filtration:

- **ISO COARSE 30%:** reduces the nominal flow rate by *approximately 5%*
- **ISO COARSE 45%:** reduces the nominal flow rate by *approximately 15%*
- **ISO COARSE 60%:** reduces the nominal flow rate by *approximately 25%*
