SUCTION PIPE "BIO-DIESEL"

Suction pipe for "Bio-Diesel" or for new fuels

Product informations

New version specifically designed for use with new fuels defined as "bio" or in any case of new origin (diesel oil, rapeseed oil, diesel-eco, etc. ..); all the sealing parts and the pipes are built with materials suitable for permanence in intake with these new mixtures, which by their composition tend to deteriorate commonly used rubbers.

Product features

- entirely brass body - probe counterweight
- tear-off lever - non-return valve - remote indicator probe
- equipped with protective cap for tear-off lever
- available in 2-pipe and 3-pipe versions

Technical Features

<i>PIPE CONNECTION</i>	Ø 3/8"
<i>PIPE LENGTH</i>	2,10 M
<i>REDUCTION</i>	Ø 1" X 2"
