TECNOBREEZE STANDING WIND

Air curtain

Product informations

TECNOBREEZE STANDING WIND, the vertical air curtain air curtain suitable for use in commercial environments, garages or in any case where overhead installation is not possible; it allows to maintain a constant temperature inside the environment, also avoiding the entry of cold or contaminated air flows from the outside. Its moving electrical parts are guaranteed for operation over 5000 hours.

Product features

- lightweight and functional, suitable for shopping malls, workshops, garage entrances and other places where overhead installation is not possible
- super slim rustproof stainless steel body and aluminum fans
- unique high efficiency performance, the centrifugal fan structure provides a strong air barrier
